Quality Assurance Tester

VICE is a global youth media company and the industry leader in producing and distributing the best online video content in the world. Launched in 1994 as a punk magazine, VICE has expanded into a multimedia network, including the world's premier source for original online video, VICE.COM; an international network of digital channels; a television & feature film production studio; a magazine; a record label; and a book-publishing division.

VICE's digital channels include Noisey, a music discovery channel; The Creators Project, dedicated to the arts and creativity; Motherboard, covering cultural happenings in technology; THUMP, focusing on global dance and electronic music; and Fightland, a channel dedicated to the culture of MMA. VICE acquired British fashion publication i-D in 2012 and re-launched i-D's digital presence at i-D.co, a video-driven fashion site. In 2013, VICE launched a news-magazine series on HBO titled 'VICE.' The Emmy nominated series is commissioned for a second season, scheduled for 2014. OVERVIEW

VICE is seeking an experienced and versatile Software Engineer in Test to test software for major product releases. You will be responsible for testing the new products/features while working in an agile product development cycle. You should be able to represent QA concerns in meetings with cross-functional, project team members and also provide valuable end-user feedback to improve the customer experience.

This position requires good understanding of software lifecycle, experience with a variety of testing techniques, strong written and organizational skills and automation experience. The Software Engineer in Test will perform an effective and organized test process that releases the highest quality product possible, and help bring those projects to market on time.

ROLES AND RESPONSIBILITIES

- Review product specifications and develop test plans for new products/features and ensure adequate test coverage
- Reproduce, isolate, and debug issues, providing detailed bug reports
- Record all test results for each test suite and provide a high level summary for areas tested
- Write automation tests to reproduce known issues and validate functionality
- Interface with beta users and triage bugs

QUALIFICATIONS

- 5+ years of experience writing and executing QA test plans for software or consumer websites

- Experience in agile development
- Knowledge of media formats/streaming
- Experience in consumer website/product space
- Hands-on experience with white box & automation testing is desired
- Python programming experience is desired
- Excellent verbal and written communication skills
- Ability to learn new technologies quickly
- Ability to work independently and be self-directed
- Experience with PHP, Javascript, HTML, CSS/SASS, MYSQL is desirable
- Bachelor's degree in Computer Science or equivalent

COMPENSATION
VICE offers a comprehensive benefits and compensation package that is commensurate with experience and abilities.
